

Public letter of endorsement

We, the individuals signed below, would like to publicly announce our endorsement of The PAKET Protocol.

The Project

The PAKET Protocol is a decentralized delivery platform. The cryptocurrency revolution allows for the purchase of goods using digital currencies, the PAKET Protocol can complete the transaction – **delivering goods in a decentralized manner**.

We view this as a great opportunity to solve a real world problem – as real as it gets – using decentralization technology in its purest form, as a genuine way to exchange goods between participants.

The protocol connects large international delivery giants with local delivery companies and even opportunistic individuals, allowing them to perform collaborative transfer of goods both locally and globally, creating a comprehensive solution - from the first mile to last.

The result is a platform that routes packages from everywhere to everywhere in the world and manages payments and collaterals between all participants without any central authority. Payments for the deliveries are ensured with smart contracts, and each courier is committed to the safety of the package while holding it.

The platform doesn't charge any commission, allowing, instead, for the emergence of a truly free, open and decentralized global marketplace that enables efficient delivery of goods.

A dedicated group of experienced individuals runs the Project, but more importantly, it is entirely committed to a transparent, free, and open development process in the true spirit of decentralization.

You can learn more about the project [here](#).

Full Disclosure

We would like to fully and publicly disclose the following facts:

- That none of the signers below has received any form of compensation for endorsing this message, whether in fiat, crypto, or otherwise.
- That some of the signers have purchased tokens of the project as a means of supporting it, and some have not.
- That the endorsement for this project is the signers' personal view and not to be considered related to any business the signer may be involved in.

We would like to make public the fact that we endorse the project, the team behind it, and believe that it's an important project for the crypto ecosystem. We would recommend anyone to educate himself on the project and consider supporting it at this early and critical stage [here](#).
